

**GIRO FE**

remote control and receiver

Code	Input	Output	Power	Connectors
F0266000005	24Vdc	24Vdc	72W	6 Micro24

**LED CONVERTER NOT INCLUDED. TO BE ORDERED SEPARATELY.**

**GIRO FE** is a wireless switch consisting of a **single-channel wireless remote control** and a **receiver module**. The control module, wired with a cable for connection to a 24Vdc power supply, has 6 Micro24 connectors and a luminous configuration button. The radio control, with two buttons, is used **to switch** all the luminaires connected to the receiver on and off and **control the brightness, in both step and dynamic mode**. GIRO can also be used to create lighting systems with multiple control modules (master and slave), control the same control module with up to 4 radio controls, and control up to 6 control modules with a single radio control.

**GIRO E**

receiver for GIRO remote control

Code	Input	Output	Power	Connectors
F0266000003	24Vdc	24Vdc	72W	6 Micro24
