

JOY D-MOTION

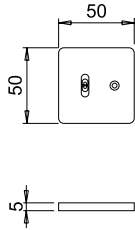

dimnable touchless switch

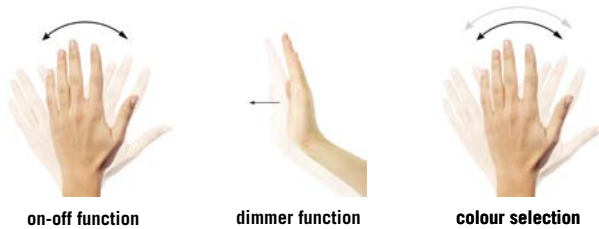

Code	Input	Outup	Power	Connectors
1785405	24Vdc	24Vdc	72W	Micro24
1785432	24Vdc	24Vdc	72W	Micro24

Code	Finish
05	aluminium
32	black matt

LED CONVERTER NOT INCLUDED. TO BE ORDERED SEPARATELY

Luminaires connected to JOY D-MOTION are turned on and off by a fast movement of the hand in front of the sensor. Holding the hand still in front of the sensor can adjust the brightness (dimmer function) and the setting saved until it is next changed (memory function).

With three fast movements of the hand in front of the sensor, it is possible to select the colour temperature of the D-MOTION luminaire connected to JOY D-MOTION. Selecting the colour enables the luminaires to be set on one of the two temperatures (e.g. 2700K or 4000K) in "white changeable" mode.

Input	2000mm Micro24 male
Output	2000mm Micro24 female
	10-ways Micro24 distributor
